

# Cover Letter

To whom it may concern:

My name is Michael Sterner. I Have a bachelor's degree in Computer Science that I finished in December of 2019. My most relevant work experience that I have comes from my experiences at Time Laboratories where I solidified my C# and Database understanding and learned most of my JavaScript typescript and CSS proficiencies.

I am a focused and motivated hard worker. I have learned many important personal and work ethic values from what I have accomplished in life, including: Serving an LDS(Mormon) mission, from which I learned Spanish; participating in multiple categories of art, such as: playing the cello; in some groups professionally, playing the piano, participating in drama, and singing in multiple choirs'.

The following is a list of classes that I have taken that would be of interest to a CS related occupation: Computer Sci and Programming I and II, Comp Organization and Assembly, Systems Analysis and Design, Networking and Virtualization, Data Structures Programming, Operating Systems, Database Design and Implementation, and Data Structures and Algorithms.

I am a High School Graduate from Pocatello High School and graduated with Honors. My mother tongue is English, but I am fluent in Spanish. I scored a 72 on the Spanish level I and II CLEP test (this test scales from 0 to 80, [link provided](#)) and will be graduating as a Spanish minor with a 3.64 G.P.A.(in the minor).

I have proficient understanding of Microsoft Office applications that I have accumulated from my major. I also understand and have had to pander to the nuances of client confidentiality in the past. I am a quick learner, so any procedures that I do not currently understand relating to agreement policies and accreditation standards for this company and its affiliates will be adhered to if I am chosen for the position.

A philosophy that I have adopted in reaction to working in field of Software development is: "Not knowing how to do something isn't an excuse for not doing it." I have found that if one is willing to do enough research, then it is possible to solve any puzzle.

Thank you for considering my application,

I am available for interview any time during the workday provided enough forewarning. You may contact me by email and by phone.

Phone: (208)221-9642
